**SYMPTOMS OF WELL BEING PURPOSE OF THE SYMPTOMS** The symptoms of well being are used to study the disease and to monitor the health or disease of individuals. Usefulness of Symptoms in Healthy People The symptoms of well being in a healthy individual can serve as an indicator of whether a particular part of the body is working properly. Symptoms of Diseases in People Symptoms of disease in people indicate that the body is being affected and work against it. In the case of disease, the symptomatology may vary and may involve different parts of the body. In people who have a disease called tuberculosis, the chest is affected and a symptom of this disease is a sore, painful cough.

**Symptoms and Examination of the Eyes** The eye has many parts that are easily identified because they are various-colored. By looking at the iris of an eye, we can see the color of the pigment. All colors seem black under normal lighting conditions, so the iris is gray. By looking at the pupils, we can see the inner parts. The pupil constricts in light, then dilates in the dark. Our eyes serve as a window to the soul. By looking at the shape of the eyes and the colors of the iris, you can tell about a person's feelings.

**Symptoms of Impairment of the Functions of the Liver** The symptoms of impairment of the functions of the liver can vary, but if you look at the color of the urine, you can see the color of the urine. The color of the urine in a normal individual is pure white. It turns yellow in kidney disease, orange in many
